Lamp Sizing and MOL Guide

Bulb Size

or diameter (maximum) is expressed in eighths of an inch (1/8"). For example an A-19 bulb is 19 eighths of an inch or 2 3/8" in diameter at its maximum dimension. To determine bulb size, use this full size ruler, which is calibrated in eighths. A list of bulb sizes and diameters are on the next page.

Bulb Shapes

Maximum Overall Length (MOL)- in inches.

MOL is measured from the top of the bulb to the bottom of the base.
